**Comparative Perspectives on School Textbooks**-Dobrochna Hildebrandt-Wypych 2021 This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

**Asian/American Curricular Epistemicide**-Nicholas D. Hartlep 2016-08-18 In this important book, Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. As Hartlep and Scott write. Asian Americans have once again been constructed as the "good minority" that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling "a single story" about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it "discourages others—even Asian-Americans themselves—from believing in the validity of their struggles" (Linshi, 2014, p. 1).

Read these and decide if they would

also be yours. Read the rankings of the Presidents as for their beliefs and actions in Federalism or Confederation. What do you think was the biggest waste of time, the invention that most changed mankind, the worst vote in History, the worst legislation, the most important message, the most patriotic American, the biggest question in History, the simplest invention that caused the biggest change, the biggest question in American history and the biggest mistake that turned out to be the greatest fortune for the United States and who was the first to use the phrase the United States of America. Alexis de Tocqueville said, "The will of the nation is one of those phrases which have been most largely abused by the wily and the despotic of every age." So do we govern by elections or by opinion polls? Read the book to find out.

**Defending the National Interest**-Stephen D. Krasner 1978-11-21 The book's basic analytic assumption is that there is a distinction between state and society. "Defending the National Interest" shows that the problem for political analysis is how to identify the underlying social structure and the political mechanisms through which particular societal groups determine the government's behavior.

**Father of Money**-Jason Whiteley 2011 In March 2004, Capt. Jason Whiteley was appointed the governance officer for Al Dora, one of Baghdad's most violent districts. His job was to establish and oversee a council structure for Iraqis that would allow them to begin governing themselves. The nature of persuading Iraqis to support the coalition quickly progressed from simply granting them privileges to ignore curfews to a more complex relationship defined by illicit dealing, preferential treatment, and a vicious cycle of assassination attempts. In these streets of Al Dora, Whiteley was feared and loved as the man they called Abu Floos--or "Father of Money." Father of Money is the story of Captain Whiteley's journey into a moral morass, where bribes and blood money, not principle, governed the dissemination of power and possibility of survival. The Iraqi people did not have the patience to withstand daily violence while they waited for the American ideals to crystallize. Captain Whiteley acted to fill this void by allying himself with the leaders who had the best chance of consolidating power, even if they were former insurgents. Eventually, because of these efforts, Captain Whiteley was himself targeted for assassination, signaling an end to his period of extensive influence. Although Captain Whiteley viewed this as a failure, he knew that he needed to reveal a part of Iraqi society that few Americans would ever witness. By delving into the Iraqi culture, Captain Whiteley had dispensed justice, divined futures, and bestowed fortunes in a way the Iraqi people understood and appreciated. This is the story of how change actually occurs in a society devoid of order.

**A Cultural History of Theatre in the Modern Age**-Kim Solga 2019-08-08 To call something modern is to assert something fundamental about the social, cultural, economic and technical sophistication of that thing, over and against what has come before. A Cultural History of Theatre in the Modern Age provides an interdisciplinary overview of theatre and performance in their social and material contexts from the late 19th century through the early 2000s, emphasizing key developments and trends that both exemplify and trouble the various meanings of the term 'modern', and the identity of modernist theatre and performance. Highly illustrated with 40 images, the ten chapters each take a different theme as their focus: institutional frameworks; social functions; sexuality and gender; the environment of theatre; circulation; interpretations; communities of production; repertoire and genres; technologies of performance; and knowledge transmission.

**Carnivàle and the American Grotesque**-Peg Aloi 2015-02-13 HBO's Carnivàle was a critically-acclaimed, elaborate period narrative set in Depression era America that set the stage for the current explosion of cinematic storytelling on television. Despite an ambitious and unusual storyline, remarkable production design and stellar cast, the show was cancelled after only two seasons. No other television series has been so steeped in history,

spirituality and occultism, and years later it retains a cult-like following. This collection of fresh essays explores the series through a diverse array of topics, from visual aesthetics to tarot symbolism to sexuality to the portrayal of deformity.

**Twentieth-Century American Art**-Erika Doss 2002-04-26 Jackson Pollock, Georgia O'Keeffe, Andy Warhol, Julian Schnabel, and Laurie Anderson are just some of the major American artists of the twentieth century. From the 1893 Chicago World's Fair to the 2000 Whitney Biennial, a rapid succession of art movements and different styles reflected the extreme changes in American culture and society, as well as America's position within the international art world. This exciting new look at twentieth century American art explores the relationships between American art, museums, and audiences in the century that came to be called the 'American century'. Extending beyond New York, it covers the emergence of Feminist art in Los Angeles in the 1970s; the Black art movement; the expansion of galleries and art schools; and the highly political public controversies surrounding arts funding. All the key movements are fully discussed, including early American Modernism, the New Negro movement, Regionalism, Abstract Expressionism, Pop Art, and Neo-Expressionism.

**The Fading of the Maoist Vision**-Rhoads Murphey 2013-11-05 First published in 1980. This book analyzes Chinese society and evaluates the achievements and failures of the Maoist ideology. The central theme is the urban and rural balance in China's development from the Revolution to the late twentieth century. The Fading of the Maoist Vision shows how the original Revolutionary blueprint was altered and the ways in which China has steered a different course from that charted by Mao as the ideological vision encountered an increasingly pressing set of economic realities. The book: · Is particularly valuable in setting China's achievements in the larger context of global ideas about the problems of national development and by comparing them to the experience of India in its pursuit of the Gandhian ideal.

**The American Quest for the Primitive Church**-Richard Thomas Hughes 1988 The dream of restoring primitive Christianity lies close to the core of the identity of some American denominations---Churches of Christ, Latter-day Saints, some Mennonites, and a variety of Holiness and Pentecostal denominations. But how can a return to ancient Christianity be sustained in a world increasingly driven by modernization? What meaning might such a vision have in the modern world? Twelve distinguished scholars explore these and related questions in this provocative book.

**The Transformation of the American Democratic Republic**-Stephen M. Krason 2017-09-08 In this stimulating volume, Stephen M. Krason considers whether the Founding Fathers' vision of the American democratic republic has been transformed and if so, in what ways. He looks to the basic principles of the Founding Fathers, then discusses the changes that resulted from evolving contemporary expectations about government. Referencing philosophical principles and the work of great Western thinkers, Krason then explores a variety of proposals that could forge a foundation for restoration. Acknowledging that any attempt to revive the Founders' views on a democratic republic must start in the public sphere, Krason focuses on concerned citizens who are aware of the extent to which our current political structures deviate from the Founders' vision and want to take action. Ultimately, a democratic republic can exist, be sustained, and flourish only when there is a deep commitment to it in the minds and norms of its people. Written by a foremost authority in the field of US Constitutional law, this book will appeal to those interested in American history, society, and politics.

**Eyesight Alone**-Caroline A. Jones 2005 Even a decade after his death, Clement Greenberg remains controversial. One of the most influential art writers of the twentieth century, Greenberg propelled Abstract Expressionist painting-in particular the monumental work of Jackson Pollock-to a leading position in an international postwar art world. On radio and in print, Greenberg was the voice of "the new American painting," and a central figure in the postwar cultural history of the United States. Caroline Jones's magisterial study widens Greenberg's

fundamental tenet of "opticality"-the idea that modernist art is apprehended through "eyesight alone"-to a broader arena, examining how the critic's emphasis on the specular resonated with a society increasingly invested in positivist approaches to the world. Greenberg's modernist discourse, Jones argues, developed in relation to the rationalized procedures that gained wide currency in the United States at midcentury, in fields ranging from the sense-data protocols theorized by scientific philosophy to the development of cultural forms, such as hi-fi, that targeted specific senses, one by one. Greenberg's attempt to isolate and celebrate the visual was one manifestation of a large-scale segmentation-or bureaucratization-of the body's senses. Working through these historical developments, Jones brings Greenberg's theories into contemporary philosophical debates about agency and subjectivity. Eyesight Alone offers artists, art historians, philosophers, and all those interested in the arts a critical history of this generative figure, bringing his work fully into dialogue with the ideas that shape contemporary critical discourse and shedding light not only on Clement Greenberg but also on the contested history of modernism itself.

**America on Film**-Sam B. Girgus 2002-10-17 In America on Film, first published in 2002, Sam Girgus examines a selection of films made in the last quarter of the twentieth century in an effort to trace how the notion of 'American' has changed drastically from that portrayed in American cinema up to the 1950s. In works such as Mississippi Masala, Lone Star, Malcolm X, Raging Bull, When We Were Kings, and Bugsy he finds a new and ethnically varied array of characters that embody American values, ideals, and conflicts; and a transformation in the relationship of American identity and culture to race and ethnicity, as well as to sexuality, gender, and the body. America on Film charts these changes through analysis of cinematic tensions between fiction, documentary, and modernism. An art form that combines fragments of reality with imagination, film, Girgus maintains, connects the documentary realism of the photographic image to the abstraction and non-representation of modernism.

**American Difference**-Lori M. Poloni-Staudinger 2015-02-11 Examining democracies from a comparative perspective helps us better understand why politics—or “who gets what, when, and how”—differs among democracies. In American Difference: American Politics from a Comparative Perspective, authors Lori M. Poloni-Staudinger and Michael R. Wolf take the reader through different aspects of democracy—political culture, institutions, interest groups, political parties and elections—and explore how the US is both different from and similar to other democracies. Used in conjunction with a textbook for courses in Introduction to American Politics, Introduction to Comparative Politics, or Introduction to Politics, this book will provide additional context and deepen students’ understanding of key political concepts.

**Henry Kissinger and the American Approach to Foreign Policy**-Cleva 1989 This analysis of Henry Kissinger's historical philosophy, statecraft, and views on international politics reveals Kissinger to be a transitional figure who urged a conversion of American foreign policy from an insular to a continental approach.

**The Black Pacific Narrative**-Etsuko Taketani 2014-11-04 The Black Pacific Narrative: Geographic Imaginings of Race and Empire between the World Wars chronicles the profound shift in geographic imaginings that occurred in African American culture as the United States evolved into a bioceanic global power. The author examines the narrative of the 'black Pacific'—the literary and cultural production of African American narratives in the face of America's efforts to internationalize the Pacific and to institute a 'Pacific Community,' reflecting a vision of a hemispheric regional order initiated and led by the United States. The black Pacific was imagined in counterpoint to this regional order in the making, which would ultimately be challenged by the Pacific War. The principal subjects of study include such literary and cultural figures as James Weldon Johnson, George S. Schuyler, artists of the black Federal Theatre Project, Langston Hughes, W. E. B. Du Bois, and Walter White, all of whom afford significant points of entry to a critical understanding of the stakes of the black Pacific narrative. Adopting an approach that mixes the archival and the interpretive, the author seeks to recover the black Pacific produced by African American narratives, narratives that were significant enough in their time to warrant surveillance and suspicion, and hence are significant enough in our time to warrant scholarly attention and reappraisal. A compelling study that will appeal to a broad, international audience of students and scholars of American studies, African American studies, American literature, and imperialism and colonialism.
